[What's new at Digital Library of Amateur Radio & Communications](#)

I can hardly express how large this warehouse is and how much reading material was available for us: Commercial radio manuals, military documents, avionics repair guides, parts catalogs, schematics.

[Kay Savetz K6KJN, Zero Retries](#)

[A shorted diode...and the sBitx](#)

I blew a diode while pushing the boundaries of my IRF520 output transistors messing around with FT8.

[WK4DS](#)

[Connecting Earth to space](#)

How Amateur Radio links us to the ISS.

[Sonshine](#)

[The most useful knots for SOTA and POTA](#)

A super convenient friction hitch when the rope is very long (no need to access the end of the rope). Easy to undo.

[AB1WX](#)

[LEO satellite systems cause environmental harm regulators didn't prepare for](#)

The disposable nature of satellites means 29 tons of satellites will re-enter our atmosphere every day at peak.
